**Subject:** RE: AWG Project Plan Discussion

So are we not doing the TARDEC part anymore, or are they just focused on near term?

Michael B. Nye PhD

Net Zero Program Manager

National Exposure Research Laboratory

EPA Region 8 - Denver

US Environmental Protection Agency

To follow up on the Friday's telecom

It went very well, they want to move forward quickly. The telecom lead (Elise) developed these

Action items:

- 1) Negotiate draft CRADA with Water Gen – Sarah and Laura
- 2) Talk with Water Gen about specifics for CRADA – Jay Garland

- 3) Develop Materials Transfer Agreement to facilitate Water Gen machine getting to Cincinnati lab – Laura
- 4) Work to have more complete draft CRADA and Project Plan – Jay Garland et. al.
- 5) Develop plan to publicize opportunity for others to enter into this CRADA – Sarah and Laura

Laura Scalise followed up with this email. Hi Elise – FYI. Sarah and I will prepare the materials transfer agreement (MTA) and the CRADA. Jay has done his part, he provided a really good draft Statement of Work. When the CRADA goes to the lab for review, he can modify the SOW at that point if needed, like adding a timeline to the activities.

So let's discuss next steps for us, including,

- 1) Working on the Project Plan draft
- 2) Other preparations for "rapid" delivery of the WaterGen system
